In the new era of epidemics, emergent infectious disease challenges are often superimposed on a background of other public health problems and scarce health care services. A panel of global health experts will explore lessons learned from recent infectious disease outbreaks and discuss ways to prepare for the next public health crisis.

**Speakers:**

**Marcia Castro, PhD**  
Associate Professor of Demography  
Department of Population & Global Health  
Harvard T.H. Chan School of Public Health  

**C. Jessica Metcalf, PhD**  
Assistant Professor of Ecology,  
Evolutionary Biology, & Public Affairs  
Departments of Ecology & Evolutionary Biology  
Woodrow Wilson School, Princeton University
